

BIO4 PRODUCTS

Creating sustainable resources
for process industry

UNLOCKING THE POTENTIAL OF BIOMASS FOR A NEW RANGE OF BIO-BASED PRODUCTS

Innovative conversion method transforming residual biomass into high added value chemicals; replacing fossil material in a wide variety of end products and delivering a 75% reduction in greenhouse gas emissions.

3 BIO-BASED PRODUCTS

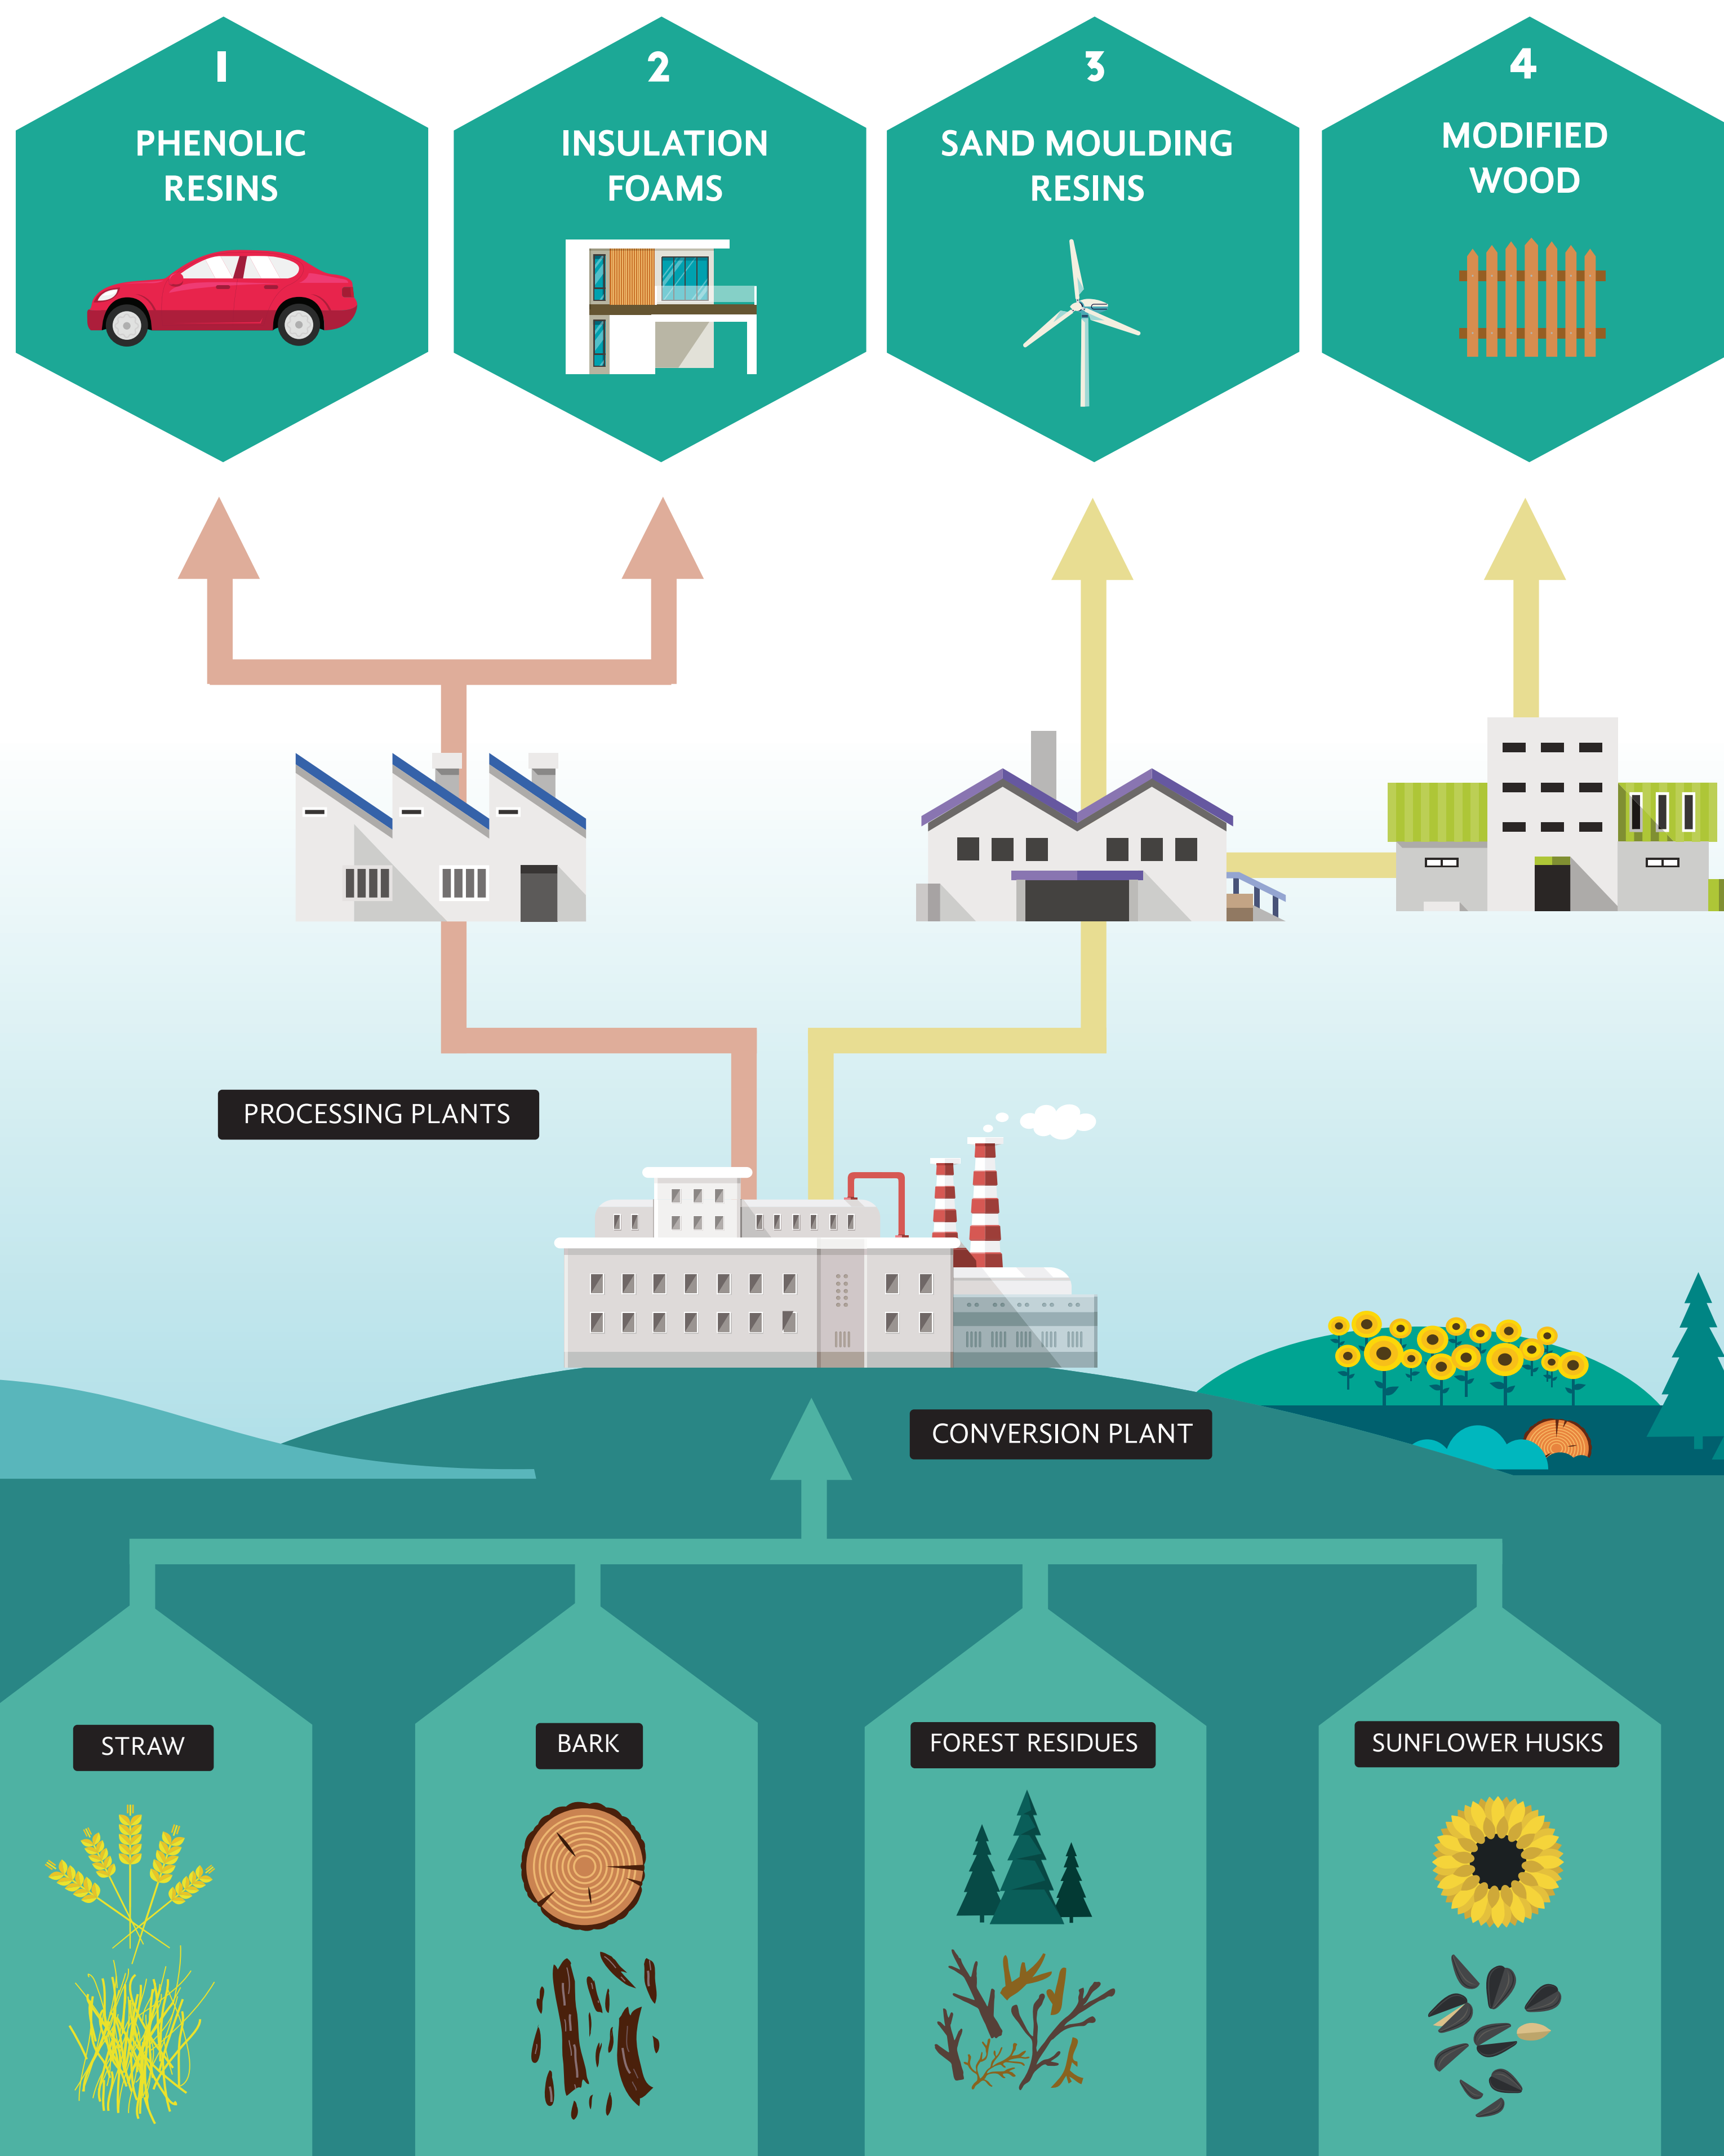

Processing
sustainable
resources into
end products

2 INNOVATIVE CONVERSION

Combining
fast pyrolysis
and fractionation

1 SUSTAINABLE FEEDSTOCK

Exploiting
renewable
and non-food
residues

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement no. 723070.
